

More holiday homes on the way at The Gallops

CONSTRUCTION of the second phase of two-bedroom apartments at Mains of Taymouth is under way. The Gallops forms part of the development of holiday homes at the five star estate. Owners Robin and Irena Menzies have recently sold several more homes to families from as far afield as the Cayman Islands and as close to home as Aberdeen. Robin said: "We are happy to say to everyone that we are building again and are completely confident in the strength of our product and its desirability in the current market. We are still hearing constantly that there are really poor returns on savings and so I would say to people, 'Put your money into property'. "We offer an expected return in excess of 6% on your investment when you buy one of our apartments at The Gallops."

Robin and Irena are using the same tried and tested team of architects and builders to create this latest phase of The Gallops, which meets VisitScotland five-star self-catering standards. The Gallops apartments are fully furnished and feature quality fixtures and fittings, creating a home from home.

A high-specification finish is evident throughout at The Gallops, with underfloor heating and extensive use of solid oak and granite. Through the award-winning Mains of Taymouth's well established holiday letting business, an apartment can be let out to others to earn a good return. Taymouth's experienced staff take care of everything, and each time the apartment is let out, it will be presented for use in pristine condition. There are no maintenance worries, as can often be the case with holiday properties. Prices at The Gallops are from £255,000 for the two-bedroom

design. One-bedroom apartments with spa bathrooms have been added to
